Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Pink salmon (thousands) have been observed over a period of years  
in the stream entering the head of Echo Cove. This is  
a popular sport fishing spot; the creek has had subsistence  
fishing in the past.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
